

# Webhook Testing Cheat Sheet 2026

A pocket reference for testing webhooks across 30 popular APIs

Updated April 2026 · [hookray.com](https://hookray.com) · One-page printable

**How to use:** when integrating a new webhook source, look it up here for the canonical events and signature method. Then point it at a free webhook URL from [hookray.com](https://hookray.com) to inspect the payload — no signup, instant URL, replay built in.

## PAYMENTS

SERVICE	SAMPLE EVENT	SIGNING
Stripe	checkout.session.completed	HMAC-SHA256
PayPal	PAYMENT.CAPTURE.COMPLETED	CERT_SIG_V1
Mollie	payment.paid	none (poll API)
Adyen	AUTHORISATION	HMAC-SHA256
Square	payment.created	HMAC-SHA256
Razorpay	payment.captured	HMAC-SHA256
LemonSqueezy	order_created	HMAC-SHA256
Paddle	subscription.created	HMAC-SHA256

## E-COMMERCE

SERVICE	SAMPLE EVENT	SIGNING
Shopify	orders/create	HMAC-SHA256
WooCommerce	order.created	HMAC-SHA256
BigCommerce	store/order/created	HMAC-SHA256
Magento	order.placed	HMAC-SHA256
Squarespace	order.create	HMAC-SHA256
Gumroad	sale	none (form-encoded)

## DEV TOOLS

SERVICE	SAMPLE EVENT	SIGNING
GitHub	push, pull_request	HMAC-SHA256
GitLab	push_events	token header
Bitbucket	repo:push	HMAC-SHA256
CircleCI	workflow-completed	HMAC-SHA256
Buildkite	build.finished	HMAC-SHA256
Vercel	deployment.succeeded	HMAC-SHA1
Netlify	deploy_succeeded	JWT-HS256
Heroku	api:release	HMAC-SHA256

## COMMUNICATION

SERVICE	SAMPLE EVENT	SIGNING
Twilio	message.delivered	HMAC-SHA1
Slack	event_callback	HMAC-SHA256
Discord	interaction	Ed25519
Telegram	message	secret_token
Zoom	meeting.started	HMAC-SHA256
Crisp	message:send	HMAC-SHA256
WhatsApp Biz	messages	HMAC-SHA256
Drift	new_conversation	HMAC-SHA256

## MARKETING & CRM

SERVICE	SAMPLE EVENT	SIGNING
Mailchimp	subscribe	none (form-encoded)
SendGrid	delivered, bounce	ECDSA
Klaviyo	profile.subscribed_to_email	HMAC-SHA256
Brevo	delivered, opened	none
Mailgun	delivered, failed	HMAC-SHA256
Postmark	Delivery	basic auth
HubSpot	contact.creation	HMAC-SHA256
Pipedrive	deal.added	basic auth
Salesforce	platform event	CometD/Cookie

## TICKETS & PROJECT

SERVICE	SAMPLE EVENT	SIGNING
Jira	jira:issue_updated	JWT
Linear	Issue create	HMAC-SHA256
Asana	resource_changed	HMAC-SHA256
ClickUp	taskCreated	HMAC-SHA256
Notion	page.updated	HMAC-SHA256
Trello	updateCard	HMAC-SHA1
Monday	create_pulse	JWT

## MONITORING & OPS

SERVICE	SAMPLE EVENT	SIGNING
Sentry	issue.created	HMAC-SHA256
Datadog	alert	none (custom)
PagerDuty	incident.trigger	HMAC-SHA256
Opsgenie	Create	HMAC-SHA256
Snyk	project.snapshot	HMAC-SHA256

## CLOUD & STORAGE

SERVICE	SAMPLE EVENT	SIGNING
AWS SNS	Notification	x509 cert
Azure Event Grid	EventGridEvent	SAS Token
Cloudinary	upload	SHA-1 hash
Mux Video	video.asset.ready	HMAC-SHA256
Dropbox	files_changed	HMAC-SHA256
Firestore	create / update	none (auth)

**Pro tip:** for any service with HMAC-SHA256 signing, the setup is identical: capture the raw body + the signature header with HookRay, hash the body with your shared secret, and compare. That's about 6 lines of code in any language. Don't trust libraries that hide the comparison — use a constant-time compare.
